International Drone Show 2027

Attend the International Drone Show 2027 in Denmark, a premier unmanned systems event in Northern Europe. At the conference and expo, you can experience live demo flights, gain new insights from leading industry experts, and tap into numerous networking opportunities.

Held annually at HCA Airport in Odense, Denmark, the International Drone Show offers a unique opportunity to explore the latest applications, solutions and technologies in the unmanned systems industry.

The two-day event is geared towards experts, researchers, engineers, programme managers, policy makers, executives and end-users in the field of drones and unmanned systems.

What to expect

- Keynotes, talks and panel discussions from industry leaders on advancements in unmanned and autonomous systems
- Live demonstrations of unmanned solutions, providing a firsthand look at technologies in action
- Expo area featuring cutting-edge technologies, components and research
- Numerous networking events including B2B matchmaking, 1:1 meetings and a networking dinner.
- Exclusive pre-events for international companies.

Themes

Over the two days, the conference features keynotes, talks and panel discussions from leading experts, providing a comprehensive overview of the latest developments within the following themes:

- Industry Use Cases & New Technologies
- Defence & Security
- Airspace & Regulation

Who is attending?

International Drone Show attracts a variety of attendees, including:

- Startups
- Researchers
- Engineers
- Industry leaders
- Policy makers
- End users.
